Professional Summary

Software Engineer with 2+ years of experience building enterprise-scale backend applications using Java, Spring Boot, REST APIs, microservices, RabbitMQ, SQL, and AWS. Experienced in designing production-ready APIs, developing event-driven services, and optimizing high-volume financial transaction systems. Currently pursuing an MSc in Software Engineering at the University of Southampton and seeking Java Backend Software Engineering opportunities within large-scale financial technology organizations.

Skills

- **Languages:** Java, Kotlin, JavaScript, SQL
- **Backend & API:** Spring Boot, REST APIs, Spring Data JPA, Microservices
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Testing:** JUnit, Mockito, React Testing Library, Integration Testing
- **DevOps & Cloud:** AWS, Docker, Gitlab, GitHub Actions, Jenkins, Linux
- **Methodologies:** Agile, Scrum, Code Reviews, Clean Architecture
- **Software Engineering:** Object-Oriented Programming, DSA, Design Patterns, SOLID Principles

Relevant Work Experience

Engineer I - Software Development *August 2023 - Sept 2025*

Accelya Services India Pvt. Ltd.

- Owned 5+ backend modules in Java 17 and Spring Boot within a production airline-settlement platform, sustaining 99% service uptime across quarterly releases and serving multiple downstream teams.
- Designed, developed, and maintained production-grade REST APIs and microservices using Java 17 and Spring Boot, following API versioning, validation, and standardized error-handling practices with OpenAPI specifications, increasing downstream-team API adoption by 40%.
- Built event-driven microservices using RabbitMQ, implementing asynchronous messaging, retry policies, and dead-letter queues to improve scalability, resilience, and reduce API latency by approximately 60%.
- Collaborated on CI/CD pipelines using GitHub Actions and Jenkins to automate build, testing, and deployment processes.
- Diagnosed and resolved production issues across distributed services, PostgreSQL databases, JVM memory, and messaging infrastructure while participating in code reviews and mentoring junior engineers.

Web Development Intern *Dec 2022 – Feb 2023*

Elite Softwares

- Developed responsive marketing site in HTML5, CSS3, JavaScript and Bootstrap; deployed with SSL and domain configuration.
- Tuned page performance and accessibility; ran cross-browser compatibility testing.

Education

MSc Software Engineering – University of Southampton, UK *Sep 2025 – Sep 2026*

Relevant Areas: Web App Development, Mobile App Development, Software Security, Project Management

B.E. Computer Engineering – Savitribai Phule Pune University, India *Aug 2019 – May 2023*

Coursework: Data Structures, Algorithms, DBMS, OOP

Projects

QuickCart – Event-Driven Order Processing Platform *Java 17 · Spring Boot · RabbitMQ · PostgreSQL · Docker · AWS · GitHub Actions*

- Designed and developed an event-driven microservices platform simulating the complete order lifecycle of a rapid-commerce application.
- Implemented asynchronous communication using RabbitMQ with retry policies and dead-letter queues to improve system resilience.
- Developed RESTful APIs for Product, Order, Inventory and Notification services following Clean Architecture and SOLID principles.
- Improved response times by integrating Redis caching for frequently accessed product data.
- Containerized services with Docker Compose and deployed to AWS through automated GitHub Actions CI/CD pipelines.

- Achieved high test coverage using JUnit and Mockito while documenting APIs with OpenAPI/Swagger.

SportsHub – Sports-Centre Booking Platform *React 18 · TypeScript · Node.js · Redux · MongoDB · Firebase*

- Built a full-stack facility booking system with JWT + Google OAuth authentication, role-based dashboards (member/staff/admin), partner matching, equipment fault reporting, and real-time notifications
- Designed a 30+ endpoint REST API with Mongoose ODM, bcrypt password hashing, rate limiting, and Swagger docs; React frontend features code-split Vite bundles, Recharts analytics, and a Leaflet interactive map
