Professional Summary

Software Engineer with 2+ years of experience building high-volume backend systems using Java, Spring Boot, RabbitMQ and AWS. Delivered measurable improvements including 60 Percent lower API latency and deployment times reduced from 30 minutes to 5 minutes through CI/CD automation. Currently pursuing an MSc in Software Engineering at the University of Southampton and seeking Software Engineer, Backend Engineer, or Platform Engineer opportunities across the UK and Europe.

Skills

- **Languages:** Java, JavaScript, TypeScript, SQL
- **Frontend:** React.js, TypeScript, Redux Toolkit, HTML5, CSS3, Responsive Design, React Testing Library
- **Backend & API:** Spring Boot, Spring Security, Spring Data JPA, REST APIs, Node.js, Express.js, Microservices
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Testing:** JUnit, Mockito, React Testing Library, Integration Testing
- **DevOps & Cloud:** AWS, Docker, GitHub Actions, Jenkins, Linux
- **Architecture:** SOLID Principles, Design Patterns, Clean Architecture, RESTful Architecture

Relevant Work Experience

Engineer I - Software Development *August 2023 - Sept 2025*

Accelya Services India Pvt. Ltd.

- Owned 5+ backend modules in Java 17 and Spring Boot within a production airline-settlement platform, sustaining 99% service uptime across quarterly releases and serving multiple downstream teams.
- Designed versioned REST APIs with OpenAPI specifications, request validation and standardised error contracts, increasing downstream-team API adoption by 40%.
- Re-engineered order-processing workflows onto RabbitMQ with retry and dead-letter-queue handling, reducing synchronous API latency by ~60% and decoupling 3 critical services.
- Diagnosed production incidents spanning PostgreSQL deadlocks, JVM memory leaks and distributed-retry failures; conducted peer code reviews and mentored two junior engineers.

Web Development Intern *Dec 2022 – Feb 2023*

Elite Softwares

- Developed responsive marketing site in HTML5, CSS3, JavaScript and Bootstrap; deployed with SSL and domain configuration.
- Tuned page performance and accessibility; ran cross-browser compatibility testing.

Projects

SportsHub – Sports-Centre Booking Platform *React 18 · TypeScript · Redux Toolkit · Node.js · Express · MongoDB · JWT · Azure*

- Built a full-stack booking platform: React 18 + TypeScript + Redux Toolkit frontend with a Node.js/Express backend, role-based access control, JWT auth and Firebase OAuth.
- Documented REST APIs with Swagger/OpenAPI; deployed frontend to Azure Static Web Apps and backend to Azure App Service via GitHub Actions CI/CD.

Cloud-Native Order Processing System *Java 17 · Spring Boot 3 · RabbitMQ · PostgreSQL · Docker · AWS EC2 · GitHub Actions*

- Architected a Spring Boot 3 microservice for order creation, validation and asynchronous processing with clean layered architecture, DTOs and domain-driven design.
- Implemented RabbitMQ messaging with retry policies and dead-letter queues; persisted state in PostgreSQL via JPA/Hibernate with connection pooling and transactional consistency.
- Containerised with Docker and deployed to AWS EC2 through a GitHub Actions pipeline with automated tests and rolling deployments.

Education

MSc Software Engineering – University of Southampton, UK *Sep 2025 – Sep 2026*

Relevant Areas: Web App Development, Mobile App Development, Software Security, Project Management

B.E. Computer Engineering – Savitribai Phule Pune University, India *Aug 2019 – May 2023*

Coursework: Data Structures, Algorithms, DBMS, OOP
